

Seaglaze hatches have been specifically designed for use on inland, coastal, and offshore craft. These hatches are available in 3 standard sizes (see chart below), or they can be custom sized and designed to meet your specific requirements.

Both the robust inner and outer frame and all external/internal fixings are manufactured using only marine grade aluminium. We have provided added strength to the hatch by fitting our own design of aluminium hinges (these are fitted as standard).

The design feature of the up stand on the outer frame ensures a positive defence against the ingress of water and to further safeguard against any leakage. The frames are silicon sealed, fish plated and screwed.

Standard Seaglaze Hatches

Part No	Aperture Size (mm)	Aperture Radius	Glazing	Stay	Finish
PR HTC 001	500 x 370	90mm	6mm clear	Peg	Powder Coat and/or SS Anodised
PR HTC 002	500 x 500	90mm	6mm clear	Peg	Powder Coat and/or SS Anodised
PR HTC 003	600 x 600	90mm	6mm clear	Peg	Powder Coat and/or SS Anodised

Glazing & Finish Options include:

- Glass - 6mm Toughened Safety Glass in clear, opaque or tinted
- Acrylic or Polycarbonate
- Aluminium sheet
- Silver Satin Anodised
- Powder Coated (choice of approx 10 different colours)

For Safety and Function, Optional Extras include:

- Adjustable ventilation stay(s) - allows a variety of openings up to approx 80 degrees
- Aluminium protection bars
- Additional catches
- Internal backing trim or liner

INSTALLATION

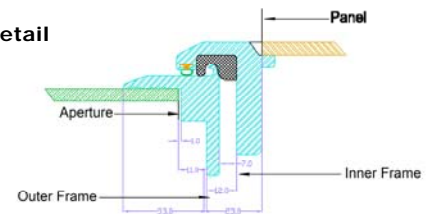

- For those customers who require it, we can supply an aperture template at a cost of £5.00.
- It is always advisable to "bed" the hatch down on a good quality, non-setting mastic.
- All hatches come pre-drilled with the outer flange drilled and countersunk for No.8 self tapping screws

For the:

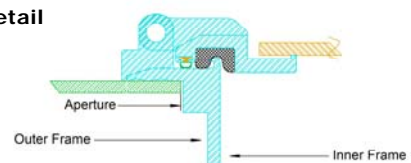

- Addition of bars add £6.00 per bar
- Addition of adjustable stays add £30.00 per stay
- Choice of tinted glass add £10.00
