

Seaglaze Marine Windows have been appointed the UK distributor of the Freeman Marine 2400 Cast Aluminium Flush Deck Hatches.

Freeman hatches are used on a wide variety of fishing boats, tugs, barges, research vessels, offshore tenders, rescue craft and other workboats.

The hatches are fast acting and easy to use. Simply grasp the handle and pull, the shaft slides into place, and with less than a quarter turn, completely disengages the locking mechanism. The dogs and linked handle do the work smoothly in just a second.

Evenly spaced dogging arms (either 3,4 or 8) exert uniform sealing pressure on the cover plate. The unique design, fit and adjustability of Freeman's dogging mechanism assures no binding or jamming of parts.

Freeman's easy lift system allows simple removal. With the locking mechanism disengaged, the hatch is resting on the deck ring and can be lifted out with one hand.

For hinged models the unique hinging device allows the hatch to be opened 180° and "floats" when the hatch is closed to create a tighter seal.

FEATURES

- Range of shapes and sizes
- Evenly spaced dogging arms exert uniform pull on the dogging plate
- 3,4 or 8 Link Operated Dogs
- Handle position shows when dogging arms are engaged or disengaged
- Handle is always attached. Hatch and handle fit flush with the deck with the handle in a recessed locked position
- Watertight hatches are designed to seal up to a 30 foot intermittent head, the double sealing gasket seals tighter under pressure
- Versatile installation, hatches can be installed in steel, aluminium, wood or fibreglass decks
- Complete units include aluminium or steel mounting rings for bolt-in or weld-in installations
- Dogging mechanism assures smooth consistent action; no binding or jamming
- Quick-acting dogging eliminates over or under tightening; hatch operates the same each time.

OPTIONS

- Knife edge or Compression sealing
- "Floating" hinges to allow 180° opening
- Aluminium or steel deck ring
