

Series 58 Ocean / Offshore

Watertight Hatches

FREEMAN
MARINE EQUIPMENT, INC.

- Seaglaze is the appointed UK distributor for Freeman hatches.
- The Freeman hatches are used on a wide variety of fishing boats, tugs, barges, research vessels, offshore tenders, rescue craft and other workboats.
- The hatches are fast-acting and easy to use, with a very smooth, unencumbered locking mechanism.
- The unique design, fit and adjustability of the Freeman dogging mechanism ensures no binding or jamming of parts.
- The easy lift out system allows simple removal and can generally be lifted out with one hand.
- For hinged models, the unique device allows the hatch to be opened to 180 degrees and 'floats' when the hatch is closed to create a tighter seal.
- **Please contact us if you have any queries.**

Sealing

Knife edge or Compression

Hinge

Floating, to allow 180° opening
