

Watertight Freeman Hatches

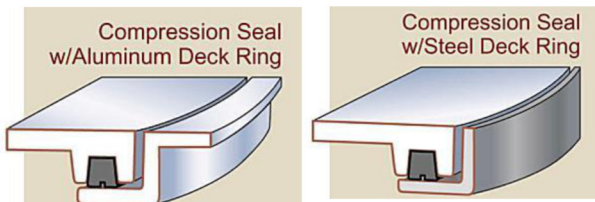

- Seaglaze is the appointed UK distributor for Freeman Hatches.
- Used on a wide variety of fishing boats, tugs, barges, research vessels, offshore tenders, rescue craft and other workboats.
- Fast-acting and easy to use, with a very smooth, unencumbered locking mechanism.
- The unique design, fit and adjustability of the Freeman dogging mechanism ensures no binding or jamming parts.
- Watertight up to 30ft of head pressure.
- For hinged models. The unique device allows the hatch to be opened to 180 degrees and “floats” when the hatch is closed to create a tighter seal.
- Aluminium or steel deck ring.
- 2400 Series Lloyds Type Approved.
- Please contact us if you have any queries.
