

## NEW FOR 2010 RINA APPROVED WEATHERTIGHT DOOR

The Seaglaze Series 24 Heavy Duty Weathertight Door can now be ordered as Type Approved to RINA Specification.

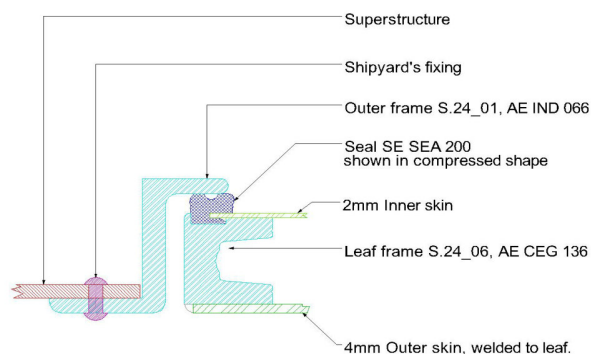

The Seaglaze Series 24 Heavy Duty Weathertight Door has been specifically styled to look simple and elegant and yet incorporate significant hidden strength.

A robust custom extruded aluminium section is used to form the outer edge of the door leaf. It has a welded flush panel on the outside and a removable panel on the inner face for maintenance. A marine grade lock can be fitted, which can include common/master key facilities.

The Type Approved Series 24 offers broad design flexibility and can be fabricated to any size up to 1800mm x 850mm. It can be left fully paneled or when specified, be fitted with a window or portlight. Hinging is by adjustable, polished, stainless bushed hinges.

To compliment the doors' surroundings, both the outer frame and door panels can be powder coated in a wide range of colours, including two colour.
