

Series 29 - Internal Doors

- Seaglaze Series 29 Internal Doors are a range of versatile, lightweight, easy “snap in” installation frames, offering simplicity yet broad variation of style.
- Originally designed and supplied in a “kit form” (which included the inner and outer frame, hinges, gasket and lock) ready for the vessels builder to frame the bulkhead cut out (timber, GRP or aluminium), thus maintaining the continuity of finish within the vessels interior.
- In addition to the frame kits we still supply, the Series 29 frame section now offers a variety of numerous design configurations, including WC Toilet doors, locker and shower doors and with a variety of frame widths and gaskets this frame section can accommodate bulkheads up to a maximum thickness of 40mm
- This stylish yet durable door can be fabricated to suit virtually any internal door requirement. It has been designed specifically to compliment the vessels interior - with precision cut panels and stylish door furniture.
- **Please contact us if you have any queries.**
