

Seaglaze Series 29 Internal Doors - A range of *versatile lightweight* easy “*snap in*” installation frames, offering *simplicity* yet broad variation of style.

Originally designed and supplied in a “**kit form**” (which included the inner and outer frame, hinges, gasket and lock) ready for the vessels builder to frame the bulkhead cut out (timber, GRP or aluminium), thus maintaining the **continuity of finish** within the vessels interior.

In addition to the frame kits we still supply, the Series 29 frame section now offers a variety of *numerous design configurations* including *WC toilet doors*, *locker* and *shower doors* and with a variety of frame widths and gaskets this frame section can accommodate bulkheads up to a maximum thickness of 40mm.

This *stylish yet durable door can be* fabricated to suit virtually any internal door requirement. It has been designed specifically to *compliment* the vessels interior - with precision cut panels and stylish door furniture.

Standard Series 29 Internal Doors are suitable for the following typical installations:

- **Bathrooms**
- **WC**
- **Lockers**
